VXT MAKES YOUR DIGITAL SIGNAGE STAND OUT

Dynamic content management

Digital menu boards allow restaurants to update and customize their menus in real time easily. This flexibility is invaluable for promoting daily specials, adjusting prices, or making changes due to ingredient availability. Out-of-stock items can be removed with ease, ensuring the boards always look crisp and clean and ensuring that customers see the most up-to-date information.

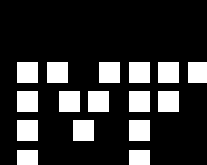

Time and cost savings

Digital menu boards reduce the time and effort required to print and distribute paper menus, saving on printing costs and minimizing waste. Changes can be made remotely and instantly, reducing the need for staff to manually update physical menus.

Terms & Conditions Apply. E&OE. Pricing is subject to change without further notice.
